

STONE COUNTY HEALTH DEPARTMENT
FOOD SERVICE INSPECTIONS

1/3/17-1/31/17

The health department divides food service code violations into two categories, critical and non-critical.

Critical violations are more likely than other violations to contribute to food contamination, illness and/or injury.

Non-critical violations, although important to the overall aesthetics and food safety of the establishment, do not necessarily present an immediate threat to food contamination, illness and/or injury.

A report for each establishment that is inspected shows the number of critical violations, along with a short statement as to the nature of the violations. The report also indicates the number of non-critical violations but does not list the nature of these violations.*=Items corrected immediately.
